RESUME

Economics graduate with experience in Business Analysis, business process improvement, ERP systems, and workflow automation. Skilled in gathering and translating business requirements into scalable analytical and automation solutions by collaborating with cross-functional stakeholders. Experienced in process mapping, requirements analysis, operational documentation, data analysis, and continuous improvement using ODOO ERP, Advanced Excel, Power BI, Python, and SQL. Passionate about helping organizations optimize business processes through automation, AI-driven technologies, and digital transformation initiatives.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy) • SQL

Databases: MySQL • PostgreSQL

ETL • Data Cleaning • Data Validation • Process Automation

Analytics: Advanced Excel (Pivot Tables, Power Query, VBA) • Power BI • KPI Reporting • Dashboard Development

ERP: ODOO ERP • SAP ERP (Foundational)

Operations: Procurement • Purchasing • Inventory Management • Vendor Coordination • Logistics Coordination

Business Analysis: Requirements Gathering • Process Mapping • Workflow Optimization • Functional Documentation •

Business Process Improvement

PROJECTS

Automated repetitive operational workflows using Python and Excel VBA.

Reduced manual processing through ERP data integration and reporting automation.

Standardized business processes for purchasing and inventory management.

Create Dashboards for KPIs Reports in the Sales and Purchasing areas

Conducted an econometric study evaluating the relationship between book prices and reading levels using Linear Regression. Collected, cleaned, and analyzed datasets to identify statistically significant relationships between economic variables. Performed data preprocessing, regression modeling, model validation, and interpretation of

WORK EXPERIENCE

Supply Chain Analyst | & ERP Automatitaton

BRAKE STATION AMÉRICA S.A. de CV.

Feb 2025 - Currently

Executed ETL processes to extract, clean, transform, and validate ERP data for reporting and business analytics.

Developed Python scripts to automate data cleaning, reconciliation, validation, and dataset preparation.

Wrote SQL queries to extract, aggregate, and validate information from relational databases.

Managed large-scale ERP master data imports, updates, and standardization while maintaining data integrity.

Applied data quality controls, duplicate detection, and validation rules across operational datasets.

Prepared structured datasets for dashboards, forecasting models, reporting, and business intelligence solutions.

Data Supply Analyst

Developed automated data workflows using Python, SQL, and Advanced Excel to streamline procurement, inventory, and operational reporting processes.

Extracted, transformed, and validated data from ODOO ERP to support business intelligence, operational planning, and decision-making.

Built ETL processes for data cleaning, transformation, reconciliation, and preparation of analytical datasets.

Automated recurring reporting tasks using Python (Pandas), Excel VBA, and SQL, significantly reducing manual effort and improving reporting accuracy.

Designed and maintained interactive dashboards and KPI reports in Power BI for procurement, supplier performance, inventory management, and logistics operations.

Standardized ERP master data through automated validation rules, improving data quality and consistency across business operations.

Collaborated with procurement, finance, warehouse, logistics, and commercial teams to translate business requirements into data-driven solutions.

Developed purchasing and inventory forecasting models using historical sales and operational data.

Supported continuous process improvement initiatives through automation, data analysis, and workflow optimization.

Administrative & Operations Support

Supported daily administrative operations, ensuring timely follow-up on operational priorities, documentation, and cross-functional communication.

Prepared operational reports, business presentations, and documentation for management decision-making.

Coordinated meetings, tracked action items, and followed up with internal departments to ensure completion of operational tasks.

Maintained organized ERP records and digital documentation supporting purchasing, finance, and operations.

Automated recurring reports using Advanced Excel (Pivot Tables, Power Query, VBA) to improve reporting efficiency.

Procurement & Inventory Coordination

Managed procurement workflows, purchase requisitions, purchase orders (POs), and supplier follow-up to ensure

Coordinated purchasing activities, supplier communication, and purchase order follow-up through ODOO ERP.

Monitored inventory levels and coordinated replenishment requests with warehouse and suppliers.

Coordinated deliveries and maintained communication between operations, warehouse, and vendors.

Standardized purchasing documentation and operational workflows.

Finance & Administrative Operations

Managed Accounts Payable and Accounts Receivable processes.

Processed supplier invoices, client billing, payment complements, and credit notes.

Performed invoice reconciliation, purchase order validation, and pricing verification with suppliers.

Managed customer credit portfolios and monitored payment follow-up.

Maintained financial records and ERP documentation supporting operational and accounting processes.

Supported internal controls through documentation review, reconciliation, and process validation.

EDUCATION

Bachelor Degree of Economics
Universidad Autónoma de Yucatán
August 2021-December2025
