

ERP Price Update Automation

Descripción

Developed a Python automation tool that compares supplier price lists with ERP product records by matching a common product code. The solution automatically identifies price changes and generates an updated file ready for ERP review, significantly reducing manual work and minimizing pricing errors.

Business Problem

The supplier sends an updated price list every month.

The ERP (Odoo) contains the current product prices.

Updating thousands of products manually is time-consuming and increases the risk of pricing errors.

Solution

The automation:

- Reads the supplier price list.
- Reads the ERP product list.
- Matches products using a common product code.
- Compares old and new prices.
- Generates an updated file highlighting price changes.

Technologies

Python
Pandas
Excel
OpenPyXL
Odoo ERP

Business Impact

Aquí es donde impresionas al reclutador.

Por ejemplo:

- ✓ Eliminated manual comparison of price lists.
- ✓ Automates comparison of thousands of ERP records.
- ✓ Minimized pricing inconsistencies.
- ✓ Standardized the price update process.
